

Our old political options are broken, and we need new choices for the 21st century. We are building a new political party that's all about working towards a better future, built on openness, collaboration and the power of the Internet to connect us all.

*Representation, not party politics.*

# TIRED OF POLITICS?

LET'S TRY

**SOME  
THING  
NEW**

*Election Communication  
for Horsham*

## REPRESENTATION, NOT PARTY POLITICS

We want to fix our broken democratic system, and move towards something that better reflects the will of all the people. We believe our strength is in collaboration; we invite all members of all parties to contribute. We trust you, the people, all of you, to use this power and end the divide between ideas and politics.

## BREXIT

We don't think the UK should leave the EU - we're better off working together. If the UK does leave, we will aim to remain part of the EEA and EFTA. If we stay, we'll campaign hard for reform, greater democracy and more transparency.

[havesomenew.io/brexit](https://havesomenew.io/brexit)

## INVEST!

Instead of starving our economy through austerity, we'll invest in it! The minimum wage will be a living wage, we'll create a national investment bank instead of handing out free money to big banks and we'll invest in new jobs in green technology not white elephants.

[havesomenew.io/invest](https://havesomenew.io/invest)

## IT'S TIME FOR SOMETHING NEW

We're offering something truly new in British politics: a party that wants to create a real alternative and to truly improve the system. That starts with proportional representation.

We're committed to giving power back to the citizens of this country.

## A FREE NHS

Free to use and free from political interference and profiteering. We don't trust politicians with the NHS - we'll make it independent and protect its funding, ending the cuts and privatisation.

[havesomenew.io/health](https://havesomenew.io/health)

## PROTECT THE ENVIRONMENT

The Earth is our source of life. We will honour our commitments to international agreements on climate change, end fossil fuel subsidies and fossil fuel extraction and invest heavily in renewable energy.
